

SHEEP SHEARING SHOW

Learn about the history of shearing and life of the shearer, while watching our shearer demonstrate the art of shearing a sheep in Australia's most unique shearing shed. This is a fascinating and humorous show, where some members of the audience can try their hand at shearing a sheep, of course, under strict guidance from an experienced shearer.

Discover wool classing, this is the financial side of the shearing. The fleece is skirted, by removing inferior pieces of wool, then classed (graded) by the wool classer and stored in selected wool bins. Later to be sold at market price. Our experienced stockmen take the audience through this process in a simple and entertaining manner.
